

Visual amount of substance required for testing.

Video
Instructions

Step 1: Use the empty fentanyl test strip packaging to mix a solution with 10 mg of substance with 5 ml of water.

(Filling the package slightly less than halfway full is approximately 5 ml)

Step 2: Dip the strip up to the “MAX” line into your solution for 60 seconds.

Step 3: Allow the strip to dry for 1 - 3 minutes.

Step 4: Compare your results to the packaging.
